SSC	Maharashtra	St. Pauls High School	2014	68.8

Technical Skills:

- Languages: Python , HTML
- Database Language   SQL
- Tools   Jupyter

PROJECT UNDERTAKEN:

1. Plant Health Detection And Automated Watering:

- This Project was made to understand the health diseases caused in plant under circumstances and how we can prevent the plants from getting adversely effected
- For doing this process I captured various photos of the leaves of plants and using this dataset In the plant health detecting tool we can get to know the process of detection
- I also created an auto watering model for doing the watering process for the plant using various sensor sense the condition and start watering process
- Health detection process was done using jupyter tool as well as pycharm and localhost
- While the auto watering process was done using arduino and various

sensors

2. Online Bus Ticket booking:

- The Project was aimed at digitizing the manual process of bus ticket booking and making it online.

- The main aim of the project was to reduce to manual work of users and provide the user an automated ticket booking system

- Process: user need to open the website and provide his details such as name, age, gender, phone number, travelling date etc. And according to provided details system will book an e-ticket for the user

- The entire process was used by using HTML/CSS

ACTIVITIES:

- SPORTS: Played At District Level In The Mumbai Central Basketball Team In 2016
- HOBBIES: Basketball, Trekking , Music and Travel
