#### PROJECT EXPERIENCE

##### **Diploma (Project Name): " Packet Hiding Method by Preventing Selective Jamming Attacks"**

The open nature of wireless medium leaves it vulnerable to intentional interference attacks, typically referred to as jamming. In this work, we address the problem of selective jamming attacks in wireless attacks. To mitigate these attacks, we develop three schemes that prevent real-time packet classification by combining cryptographic primitives with physical-layer attributes. We analyze and evaluate their computational and communication overhead. Keywords-Selective Jamming, Denial of Service, Wireless Networks, Packet Classification.
